

A CONCRETE FIXING SYSTEM FOR VERTICAL WALL REPAIRS
This system has been developed for vertical concrete wall crack repair
with Roadware 10-Minute Concrete Mender™

GEBBIE TECH LTD

COMPLETE CONCRETE WALL CRACK REPAIRS IN JUST ONE DAY!

The Gebbie Tech system is a proven vertical concrete wall crack repair method using Roadware 10-Minute Concrete Mender™.

The Gebbie Tech System achieves :

- **Fast cure times.** Due to the curing time of the Roadware 10-Minute Concrete Mender™ - complete repairs in just one day! Over 40 lineal metres have been achieved in one day, by a two-person crew.
- **Easy application.** The Gebbie Tech System is clear and simple – the system uses low cost hardware store components, a hand gun and the Roadware 10-Minute Concrete Mender™. A detailed step by step instructional video and process booklet is included. Within an hour, you can be skilled in the Gebbie Tech System.
- **High strength results.** Independent testing with Opus International Consultants has demonstrated the repair has compressive strength significantly stronger than the manufactured panel.
- **Complete penetration.** The composition of the Roadware 10-Minute Concrete Mender™ travels easily from the injection points to repair all cracks.
- **Overall cost savings.** The Gebbie Tech System is very economical. There is no need for expensive pumps! Repairs with the Gebbie Tech System are completed in a shorter timeframe due to the fast cure times of Roadware 10-Minute Concrete Mender™ using a hand gun. Most items in the Gebbie Tech System you will have in your set up. Saving you time and money compared with alternative repair methods.
- **Labour Savings.** Due to the fast cure times of Roadware 10-Minute Concrete Mender™ repairs are completed within 2 to 12 hours dependant on the temperature and the length of crack – allowing you to move on to other work sooner. Alternative processes can take up to 3 days to repair a concrete wall, due to both the method of application and cure time.
- **Less downtime for other contractors.** Subsequent contractors can access the site quickly, allowing businesses to be back operational within much shorter timeframes.

Conventional repair methods with epoxy have longer repair times, additional downtime and are more expensive. The Gebbie Tech System uses the cost effective Roadware 10-Minute Concrete Mender™ hand gun to repair walls.

The Gebbie Tech System using Roadware 10-Minute Concrete Mender™ transforms Vertical Concrete Wall Crack Repairs.

The Gebbie Tech System kit contains:

- 1x Gebbie Tech Steel Stiffener – straight
